

# AKASH PEDRAJ

DevOps Engineer | AWS | Kubernetes | CI/CD | Terraform | GitOps  
Pune, Maharashtra | +91-7774053274 | [akashpedraj121@gmail.com](mailto:akashpedraj121@gmail.com) | [LinkedIn](#) | [GitHub](#)

## Professional Summary

DevOps Engineer with hands-on experience building CI/CD pipelines, containerizing microservices, and deploying cloud-native solutions on AWS. Proficient in Kubernetes (EKS), Helm, Terraform IaC, ArgoCD/GitOps, and Ansible. Background in full-stack development brings a developer-first perspective to infrastructure and automation. Focused on reducing deployment friction, improving reliability, and building secure, cost-efficient infrastructure at scale.

## Technical Skills

|                |                                                              |
|----------------|--------------------------------------------------------------|
| Cloud          | AWS (EC2, VPC, IAM, S3, RDS, ECR, EKS, Route 53, CloudWatch) |
| CI/CD & GitOps | Jenkins, GitHub Actions, ArgoCD                              |
| Containers     | Docker, Kubernetes (EKS), Helm Charts, RBAC                  |
| Infrastructure | Terraform, Ansible, Infrastructure as Code                   |
| Security       | IAM Least-Privilege, SonarQube, Trivy, AWS Secrets Manager   |
| Monitoring     | Prometheus, Grafana, CloudWatch                              |
| Tools          | Git, Linux (Ubuntu), Bash/Shell Scripting, Agile/Scrum       |

## DevOps Projects

### Cloud-Native Food Delivery Platform — CI/CD & Kubernetes [\[GitHub\]](#)

- Engineered multi-stage CI/CD pipeline (Jenkins + Docker + EKS), cutting manual deployment steps by ~70%.
- Deployed 5+ microservices on AWS EKS with Helm Charts; configured HPA for auto-scaling and RBAC namespace isolation.
- Enforced IAM least-privilege and private ECR; integrated Prometheus, Grafana, and CloudWatch for real-time monitoring.

### Online Ticketing Platform — DevOps Automation [\[GitHub\]](#)

- Built Jenkins pipelines with SonarQube quality gates and Trivy image scanning, reducing failed production deployments.
- Modularized Terraform codebase (3 reusable modules) for consistent multi-environment AWS provisioning.
- Automated EC2 server configuration using Ansible playbooks, eliminating all manual setup.

### AWS 3-Tier Web Application Deployment [\[GitHub\]](#)

- Architected secure VPC with public/private subnet separation; restricted DB tier to private subnet only.
- Configured IAM roles, AWS Secrets Manager, and Route 53 for domain routing and failover.
- Deployed Auto Scaling EC2 fleet with RDS backend across 2 AZs; reduced estimated infra costs ~30% via right-sizing.

## Experience

### DevOps Engineer Intern — StarAgile, Pune Jul 2025 – Apr 2026

- Built multi-stage CI/CD pipelines (Jenkins + GitHub Actions), reducing release cycle time by ~40%.
- Managed AWS infrastructure via reusable Terraform modules; ensured reproducible provisioning across 3 environments.
- Deployed containerised workloads on EKS using Helm; configured Prometheus + Grafana alerting for 99.5% uptime visibility.
- Enforced IAM least-privilege, reviewed security groups, and integrated Trivy scanning to reduce cloud attack surface.

### Software Engineer — Party Witty, Pune Jan 2025 – Jul 2025

- Developed and maintained responsive web features, collaborating with backend team on REST API integration.
- Streamlined Git branching workflows and assisted in deployment pipelines; participated in Agile sprint planning and code reviews.

### Full Stack Developer Intern — Darshan Divine Pvt Ltd Oct 2024 – Jan 2025

- Built modular React.js components integrated with REST APIs, contributing to 3+ production features.
- Assisted in deployment preparation, environment configuration, and participated in peer code reviews.

## Education

### Bachelor of Computer Engineering — GES R.H. Sapat College, Nashik 2023 CGPA: 7.5

## Certifications

DevOps Engineering Program – StarAgile | AWS Cloud & DevOps Certification – StarAgile | Docker Essentials | Scalable Applications on Kubernetes
